

# Table of Contents

**Preface**  
**Dedication**  
**Organizing Committees**  
**Table of Contents**

## **Opening Plenary Presentations**

New Results from H1  
O. Behnke

ZEUS Results  
E. Gallo

Tevatron Results  
R. Lefevre

Lepton-Nucleon Spin Physics  
D. Ryckbosch

Parton Distributions  
J. Pumplin

Recent Developments in Perturbative QCD  
L. Dixon

QCD and Event Generators  
P. Skands

Heavy flavour Production  
S. Frixione

Life and Death Among the Hadrons  
R. Jaffe

Summary of the HERA/LHC Workshop  
A. De Roeck

## **Working Group and Workshop Summaries**

Structure Functions  
J. Cole, J. Qiu and U.-K. Yang,

Diffraction & Vector Mesons  
V. Khoze, X. Janssen and M. Ruspa

Hadronic Final States  
C. Glasman, S. Maxfield and P. Nadolsky

Spin Physics  
K. Kumar, P. Di Nezza and M. Stratmann

Heavy Flavors  
Theory summary: G. Corcella,  
Experimental Summary: A. Mehta and M. Corradi

Electroweak and Beyond the Standard Model Physics  
B. Heinemann, A. Tapper and C.-P. Yuan

Summary of DIS05  
A. Caldwell

### **Structure Function Working Group Presentations**

Measurement of the proton structure function  $F_2$  at low  $Q^2$  in QED Compton scattering at HERA  
E. Lobodzinska

Measurements of the Structure Functions  $F_2(x, Q^2)$  and  $F_L(x, Q^2)$  at low  $Q^2$   
A. Petrukhin

Averaging of DIS Cross Section Data  
A. Glazov

NuTeV Structure Function Measurement  
M. Tzanov

W Asymmetry and Z Rapidity Measurements  
Y. Chung

Structure Functions of Bound Neutrons  
S. Kuhn

Structure functions at large Bjorken  $x$  and the Transition between perturbative and non-perturbative QCD  
S. Liuti, N. Bianchi, and A. Fantoni

A Unified Model for inelastic e-N and  $\nu$ -N cross sections at all  $Q^2$   
A. Bodek and U. Yang

Scheme-Invariant Evolution to NNLO

A. Guffanti and J. Bluemlein

NLO BFKL tests using the proton structure function  $F_2$  measured at HERA

C. Royon

Global Analyses of Nuclear PDFs

V. Kolhinen

Coherent Power Corrections to Structure Functions

I. Vitev

Novel Nuclear effects in QCD: The Non-Universality of Nuclear Antishadowing and the Implications of Hidden Color

S. Brodsky

Rapidity dependence of High- $p_T$  suppression

F. Videbaek

Nuclear Modification Factors for Hadrons at Forward and Backward Rapidities in Deuteron-Gold collisions at  $\sqrt{s_{NN}} = 200$  GeV

C. Zhang

Neutral Pion Suppression at Forward Rapidities in d+Au Collisions at STAR

G. Rakness

Particle Production and Correlations in p(d)A Collisions

Y. Kovchegov

Forward Production in d+Au Collisions by Parton Recombination

R. Fries

Impact of large-x resummation on parton distribution functions

G. Corcella and L. Magnea

Saturation, traveling waves, and fluctuations

R. Enberg

Nonlinear evolution equations in QCD and effective Hamiltonian at high energy

A. Stasto

From dense-dilute duality to self duality in high energy evolution

A. Kovner

Development of Chaos in the Color Glass Condensate

K. Tuchin

Gluon Distributions and Fits Using Dipole Cross-Sections  
R. Thorne

The EMC effect in effective field theory  
W. Detmold

Understanding parton distributions from lattice QCD  
D. Renner

Quark Asymmetries in Nucleons  
J. Alwall

Polarized Dependence of the Total CC  $e^\pm p$  Cross Section  
A. Nikiforov

High  $Q^2$  DIS cross section at HERA with longitudinally polarized positron beams  
A. Tapper

Neutral Current cross-sections at high  $x$   
Y. Ning

Parity Violation in Møller scattering  
K. Kumar

Parity Violation in eP scattering at Jlab  
P. Souder

Parton Uncertainties and the Stability of NLO Global Analysis  
D. Stump

Recent Progress in Parton Distributions and Implications for LHC Physics  
R. Thorne, A. Martin, R. Roberts and W. Stirling

Improving the determination of the gluon density in the proton using jet data from ZEUS  
J. Terron

The neural network approach to parton fitting  
J. Rojo, L. Del Debbio, S. Forte, J. Latorre, and A. Piccione

Tevatron Measurements and PDF Uncertainties  
F. Chlebana

Precision Measurements of W and Z Boson Production at the Tevatron  
J. Hays

Jet Physics and PDFs at the Tevatron

A. Harel

Neutrino Oscillation Experiments and Cross Section Modeling

H. Gallagher

Impact of future HERA data on the determination of proton parton distribution functions using the ZEUS QCD fit

C. Gwenlan-Barr

### **Diffraction & Vector Mesons Working Group Presentations**

New data on elastic  $J/\psi$  production from H1 at HERA

C. Kiesling

Vector meson production at HERA

D. Szuba

Diffraction Production of Vector Mesons and the Gluon at small  $x$

T. Teubner

New Measurement of DVCS Cross Section at HERA

A. Glazov

Measurement of Deeply Virtual Compton Scattering at HERMES

M. Kopytin

Exclusive meson production at HERMES

A. Vandenbroucke

Diffraction photoproduction of  $\rho$  mesons with large momentum transfer at H1

C. Gwilliam

Diffraction  $\rho^0$  production at COMPASS

N. d' Hose

Deeply virtual vector meson electroproduction at small Bjorken- $x$

P. Kroll

Diffraction Dijet Photoproduction

M. Klasen and G. Kramer

ZEUS results on inclusive diffraction

H. Lim

H1  $F_2^D$  and Diffractive Charged Current Results

P. Laycock

ZEUS results on rapidity gap events in charged and neutral current processes at large  $Q^2$

L. Adamczyk

Pomeron Structure and Diffractive Parton Distributions

A. Levy, H. Abramowicz and M. Groyz

HERA Diffractive Structure Function Data and Parton distributions

P. Laycock, P. Newman and F. Schilling

Diffractive deep inelastic scattering

A. Martin, M. Ryskin, and G. Watt

Multiplicity structure in inclusive and diffractive deep inelastic  $e^+p$  collisions at HERA

T. Anthonis

Measurement of Dijets with a Leading Neutron in ep Interactions at HERA

A. Bunyatyan

Diffractive  $D^{*\pm}$  Meson Production in Deep-Inelastic Scattering at HERA

M. Beckingham

Diffractive Dijets in DIS and Photoproduction

M. Mozer

Diffractive photoproduction of dijets at ZEUS

R. Renner and S. Kagawa

$D\bar{D}$  results in diffraction

L. Mundim

Update of CDF results on Diffraction

K. Goulios

Double Pomeron Physics at the LHC

M. Albrow

Multigap Diffraction at LHC

K. Goulios

Hard Diffraction in QCD

S. Brodsky

$A_N$  measurement in the CNJ region, at  $\sqrt{s} = 200$  GeV in polarized pp elastic scattering  
W. Guryń

Diffraction Dissociation – 50 Years later  
S. White

Photoproduction at Hadron Colliders  
S. Klein

Saturation 2005 (mini-review)  
E. Levin

The FP420 R&D Project: Forward Proton Tagging at the LHC as a means to Discover New Physics  
B. Cox

High Energy Photon Interactions at the LHC  
K. Piotrkowski

High mass diffraction at the LHC  
C. Royon

### **Electroweak and Beyond the Standard Model Working Group Presentations**

Electroweak Fits and the Higgs Mass  
P. Renton

W Boson Mass and Properties  
C. Hays

Determination of electroweak parameters at HERA with the H1 experiment  
B. Portheault

Top Quark Mass and Properties at the Tevatron  
J. Arguin

Universality of  $q_T$  resummation for electroweak boson production  
P. Nadolsky & A. Konychev

Search for Events with Isolated Leptons and Large Missing Transverse Momentum  
C. Veelken

Single W Boson Production at HERA  
K. Piotrkowski

Top Quark Production Cross-Section at the Tevatron Collider  
K. Ranjan

Precision Electroweak Measurements at LHC  
K. Mazumdar

General Analysis of Single Top Production and W Helicity in Top Decay  
F. Larios, C. Chen and C.-P. Yuan

Supersymmetry: Theory Overview  
H. Baer

SUSY Searches at H1  
D. South

Searches for R-parity violating Supersymmetry at ZEUS  
C. Horn

Search for Supersymmetry at the Tevatron  
J. Zhou

SUSY Searches at the LHC  
N. Ozturk

Multi-Lepton Events at H1 and Search for Doubly Charged Higgs Bosons  
A. Schoening

Higgs Searches at the Tevatron  
C. Hensel

Higgs Searches at the LHC  
M. Escalier

The role of PDF uncertainty for inclusive Higgs boson production at the Tevatron and LHC  
A. Belyaev

Search for Leptoquarks and Lepton Flavor Violation at the H1 experiment  
L. Lindfeld

Search for lepton flavor violation at ZEUS  
G. Barbagli

Searches at the Tevatron  
R. Illingworth

Top quark and charged Higgs production at hadron colliders  
N. Kidonakis

Searches for New Physics in the Flavor Sector at the B Factories  
T. Meyer

Searches for New Physics in the Flavor Sector  
M. Herndon

New Physics in the Flavor Sector  
S. Gopalakrishna and C.-P. Yuan

### **Hadronic Final States Working Group Presentations**

H1 search for a narrow baryonic resonance decaying to  $K_s^0 p(\bar{p})$   
C. Risler

Analysis of the Anti-charmed Baryon State at H1  
K. Daum

The search for strange pentaquarks at ZEUS  
Z. Ren

The Experimental Search for Charm Pentaquarks in the ZEUS Detector at HERA  
Y. Eisenberg

Pentaquark Searches at HERMES  
A. Airepetian

Status Report of NNLO QCD Calculations  
M. Klasen

Monte Carlo event generators  
S. Frixione

Precision Measurements of  $\alpha_s$  at HERA  
C. Glasman

Jet Physics in Run 2 at CDF  
R. Field

Soft-gluon expansions through NNNLO  
N. Kidonakis

Multi Jet production at high  $Q^2$   
T. Kluge

Inclusive Jet Cross Sections in Neutral Current DIS Events in the Breit Frame  
J. Standage

Study of color dynamics in photoproduction at HERA  
J. Terron

Event shapes in deep inelastic  $ep \rightarrow eX$  scattering at HERA  
A. Everett

Neutral- and charged-kaon Bose-Einstein correlations in DIS  
A. Galas

$q_T$  Uncertainties for W and Z Production  
F. Olness

A Closer Look at the Analysis of NNL BFKL  
J. Andersen

Azimuthal asymmetries in deep inelastic scattering at HERA  
A. Ukleja

Azimuthal asymmetries in deep inelastic  $e^+p \rightarrow e^+X$  scattering at HERA  
T. Tymieniecka

Pentaquark at JLab: the g11 experiment in CLAS  
M. Battaglieri, R. De Vita and V. Kubarovsky

Theoretical aspects of pentaquark searches  
A. Szczepaniak

Forward jets in DIS at ZEUS  
N. Vlasov

QCD corrections to the electroproduction of hadrons with high  $p_T$   
R. Sassot, A. Daleo and D. de Florian

Inclusive electroproduction of light hadrons with large  $p_T$  at next-to-leading order  
B. Kniehl

Small-x effects in forward jet production at HERA  
C. Marquet

Measurement of prompt photon cross sections in photoproduction at H1  
J. Ferencei

NLO Photon Parton Parametrization Using ee and ep Data  
A. Levy, H. Abramowicz and W. Slominski

Charged multiplicity distributions in deep inelastic scattering at HERA  
M. Rosin

The fragmentation process at HERMES  
B. Maiheu

Gaps between Jets: Matching two Approaches  
A. Kyrieleis

Polarization and asymmetries in neutral strange particle production  
A. Cottrell

New possible insight into JLab proton polarization data puzzle by DIS  
A. Dubnickova, E. Bartos, S. Dubnicka and E. Kuraev

Production of Direct Photons,  $\pi^0$ 's, and  $\eta$ 's in p+p and Au+Au Collisions at RHIC  
T. Awes

Jet properties from  $\pi^\pm - h^\pm$  correlation in p+p and d+Au collisions  
J. Jia

### **Heavy Flavors Working Group Presentations**

Charm production at low  $Q^2$  with the ZEUS Detector  
G. Aghuzumtsyan

The Structure of Charm Jets in Deep-Inelastic Scattering  
A. Perieanu

Jet Cross Sections in  $D^*$  Photoproduction with ZEUS  
T. Kohno

Photoproduction of  $D^*$  Mesons and Jets with H1  
G. Flucke

Study of Jet Shapes in Charm Photoproduction at HERA  
M. Martisikova

Heavy Quarkonium Production: Extending CSM and COM  
J. Lansberg

ZEUS Measurement of Inelastic  $J/\psi \rightarrow \mu^+\mu^-$  Production in DIS  
A. Antonov

Soft Resummation for Heavy-Quark Production

A. Mitov

Charmonium production in two-photon collisions at next-to-leading order

B. Kniehl

Measurements of Charm and Charmonium Production by PHENIX

K. Read

Heavy Quark Parton Distribution Functions

F. Olness and S. Kretzer

A Variable-Flavour-Number Scheme at NNLO

R. Thorne

NuTeV Strange/Antistrange Sea Measurements from Neutrino Charm Production

D. Mason

Heavy Quark Fragmentation Function at NNLO

A. Mitov

Charm Fragmentation Fractions and the Charm Fragmentation Function

Z. Rurikova

Measurements of charmed hadrons production in deep inelastic scattering with ZEUS

R. Walsh

Hadroproduction of D and B mesons in a massive VFNS

I. Schienbein, B. Kniehl, G. Kramer and H. Spiesberger

Charm physics at BABAR

C. Chen

Charm physics at Belle

B. Yabsley

Results from ZEUS on Charm and Beauty Production at HERA II

R. Hall-Wilton

Inclusive and dijet b productions at CDF

R. Lefevre

Measurement of beauty production with  $\mu\mu$  correlations

A. Longhin

Measurement of Beauty and Charm Photoproduction at H1 using inclusive lifetime tagging  
L. Finke

Measurement of  $F_2^{cc}$  and  $F_2^{bb}$  at Low and High  $Q^2$  using the H1 Vertex Detector  
T. Klimkovich

Charm and Beauty Production at HERA-B  
U. Husemann

Measurement of beauty production at HERA using events with muons and jets  
O. Behnke

Heavy quark production in conjunction with Z boson at D0  
N. Parua

### **Spin Physics Working Group Presentations**

Precise Results on  $g_1^p$  and  $g_1^d$  and First Measurement of the Tensor Structure Function  $b_1^d$  with the HERMES-experiment  
D. Reggiani

Measurement of the spin structure of the deuteron at COMPASS  
J. Hannappel

Extraction of polarized parton densities from polarized DIS and SIDIS  
R. Sassot, D. de Florian and G. Navarro

Synthesis of DGLAP and total resummation of leading logarithms for the non-singlet spin structure function  $g_1$   
B. Ermolaev, M. Greco and S. Troyan

Polarized Structure Functions from Lattice QCD  
G. Schierholz

Transversity measurements at HERMES  
M. Dieffenthaler

Collins and Sivers asymmetries on the deuteron from the COMPASS data  
P. Pagano

Transversity Properties of Quarks and Hadrons SIDIS and Drell-Yan  
L. Gamberg and G. Goldstein

New results on SIDIS SSA from Jefferson Lab  
H. Avakian, P. Bosted, V. Burkert and L. Elouadrihiri

Spin dependent fragmentation functions at BELLE  
R. Seidl, A. Ogawa, D. Gabbert, M. Grosse-Perdekamp and K. Hasuko

First measurement of interference fragmentation on a transversely polarized hydrogen target  
P. van der Nat

Transversity signals in two hadron correlation at COMPASS  
R. Joosten

Latest Results on  $g_1$  and  $g_2$  at high- $x$   
J. Chen

$g_1(x)$  and  $g_2(x)$  in the Meson Cloud Model  
T. Signal

Jefferson Lab results on the  $Q^2$ -evolution of moments of spin structure functions  
A. Deur

QCD Factorization for Semi-inclusive Deep Inelastic Scattering  
F. Yuan

Large  $x$  Physics  
S. Brodsky

Understanding the role of Cahn and Sivers effects in Deep Inelastic Scattering  
A. Prokudin, M. Anselmino, M. Boglione, U. D'Alesio, A. Kotzinian and F. Murgia

Forward  $\pi^0$  Production from transversely Polarized Protons at STAR  
S. Heppelmann

Transversity Physics Results from PHENIX  
M. Chiu

Single Spin Asymmetries in the BRAHMS Experiment  
F. Videbaek

Next-to-leading Order QCD Corrections to  $A_{TT}$  for Single-Inclusive Hadron Production  
A. Mukherjee, M. Stratmann and W. Vogelsang

Double helicity asymmetry measurements with the PHENIX detector at RHIC  
A. Deshpande

The Longitudinal Spin Program at STAR  
R. Cadman

Recent measurement of  $\Delta G/G$  at COMPASS  
C. Bernet

The Effect of Positivity Constraints on Polarized Parton Densities  
D. Stamenov, E. Leader, and A. Sidorov

New Results on Testing Duality in Spin Structure from Jefferson Lab  
N. Liyanage

PAX: Polarized Antiproton eXperiments  
P. Lenisa

Study Quark and Antiquark Contribution to Proton Spin Structure at RHIC  
X. Wei

Electron Polarimetry: Status and Prospects  
E. Chudakov

Proton Beam Polarimetry at RHIC  
A. Bravar

### **Future of DIS Presentations**

Deeply Inelastic Scattering: Achievements and Needs  
J. Bluemlein

eRHIC: The Electron Ion Collider at BNL and its Spin Physics Program  
A. Deshpande

Heavy ion physics at eRHIC  
J. Jalilian-Marian

eRHIC- Accelerator and Detector Design  
B. Surrow

Prospects of DIS with fixed targets  
E. Rondio

Physics with HERA and Beyond  
M. Klein

Using Neutrinos as a Probe of the Strong Interaction  
J. Morfin

Deep Inelastic Scattering at the Amplitude Level  
S. Brodsky

**List of Participants**

**Author Index**
